

Derwentwater Independent Hostel

Health and safety policy

This is the statement of general policy and arrangements for:

Derwentwater Independent Hostel
Name of organisation

Overall and final responsibility for health and safety is that of:

Derwentwater Independent Hostel
Name of employer

Day-to-day responsibility for ensuring this policy is put into practice is delegated to:

Tim Butcher – Hostel Manager

Statement of general policy	Responsibility of (Name / Title)	Action / Arrangements (Customise to meet your own situation)
To prevent accidents and cases of work-related ill health and provide adequate control of health and safety risks arising from work activities	Tim Butcher – Hostel Manager	Relevant risk assessments completed and actions arising out of those assessments implemented. (Risk assessments reviewed every year, or earlier if working habits or conditions change.)
To provide adequate training to ensure employees are competent to do their work	Tim Butcher – Hostel Manager	Induction and training includes fully documented safe methods of working for all aspects of employment. Safe methods of work take full account of all risk assessments.
To engage and consult with employees on day-to-day health and safety conditions and provide advice and supervision on occupational health	Tim Butcher – Hostel Manager	Staff consulted on all Health & Safety issues. Regular staff bulletins are produced and staff meetings held with up to date advice on health and safety matters. Meeting agendas have health and safety as a standing item on the agenda.
To implement emergency procedures - evacuation in case of fire or other significant incident.	Most senior member on duty. All staff even if off duty must help in any emergency evacuation	Evacuation plan is fully documented and covered in staff induction. Full practise evacuations carried out regularly. All escape routes marked and kept clear as per the Fire Risk assessment.
To maintain safe and healthy working conditions, provide and maintain plant, equipment and machinery, and ensure safe storage / use of substances	Tim Butcher – Hostel Manager	Regular two weekly at minimum safety checks carried out and documented. PAT tests annually, boilers & fire alarms serviced six monthly, fire extinguishers serviced annually. SFBB catering safety system implemented. COHSS training and documentation. Nightly safety closedown system. All system reviewed annually or on change of working practise/conditions.

Health and safety law poster is displayed:	Office
First-aid box and accident book are located: Accidents and ill health at work reported under RIDDOR: (Reporting of Injuries, Diseases and Dangerous Occurrences Regulations : www.hse.gov.uk/riddor)	First aid kit in Catering Kitchen. . Accident book in office cupboard under drawer

Signed: (Employer)	Tim Butcher – Hostel Manager	Date:	01/11/2021
Subject to review, monitoring and revision by:	Tim Butcher – Hostel Manager	Every:	12 months or sooner if work activity changes

Good handling technique for lifting

Here are some practical tips, suitable for use in training people in safe manual handling. In the following section a basic lifting operation is taken as an example.

- **Think before lifting/handling.** Plan the lift. Can handling aids be used? Where is the load going to be placed? Will help be needed with the load? Remove obstructions such as discarded wrapping materials. For a long lift, consider resting the load midway on a table or bench to change grip.

Think before lifting/handling

Keep the load close to the waist

Derwentwater Independent Hostel

Manual Handling Risk Ass. & Techniques

Completed by: Tim Butcher

Date of assessment: 01/11/21

Review date: 12 months

Health and Safety
Executive

Adopt a stable position with feet apart and one leg slightly forward to maintain balance

Start in a good posture

- **Keep the load close to the waist.** Keep the load close to the body for as long as possible while lifting. Keep the heaviest side of the load next to the body. If a close approach to the load is not possible, try to slide it towards the body before attempting to lift it.
- **Adopt a stable position.** The feet should be apart with one leg slightly forward to maintain balance (alongside the load, if it is on the ground). The worker should be prepared to move their feet during the lift to maintain their stability. Avoid tight clothing or unsuitable footwear, which may make this difficult.
- **Get a good hold.** Where possible the load should be hugged as close as possible to the body. This may be better than gripping it tightly with hands only.
- **Start in a good posture.** At the start of the lift, slight bending of the back, hips and knees is preferable to fully flexing the back (stooping) or fully flexing the hips and knees (squatting).
- **Don't flex the back any further while lifting.** This can happen if the legs begin to straighten before starting to raise the load.
- **Avoid twisting the back or leaning sideways,** especially while the back is bent. Shoulders should be kept level and facing in the same direction as the hips. Turning by moving the feet is better than twisting and lifting at the same time.
- **Keep the head up when handling.** Look ahead, not down at the load, once it has been held securely.
- **Move smoothly.** The load should not be jerked or snatched as this can make it harder to keep control and can increase the risk of injury.
- **Don't lift or handle more than can be easily managed.** There is a difference between what people can lift and what they can safely lift. If in doubt, seek advice or get help.
- **Put down, then adjust.** If precise positioning of the load is necessary, put it down first, then slide it into the desired position.

Date of assessment: 27/02/18

Includes Orienteering & Games etc

Review date: 27/02/19

Hazards	Risks	Control Measures	Further Action Required	Action Owner	Completed	Residual Risk
Access to natural hazards of the site (i.e. water courses, steep drops, tree climbing etc)	Injury to customers, visitors and staff encountering any natural hazard of the site	<ul style="list-style-type: none"> ▪ A map of the hazards is on display and customers are warned in the welcome sheet and room notice. ▪ Hazards have been fenced off where practical ▪ Group leaders are advised of site hazards during pre-site visit/enquiries by the hostel ▪ Manager regularly checks grounds for new hazards eg fallen trees etc ▪ Notice advising that all children should be supervised in the grounds and should not climb trees , walls , fences or approach water courses etc 				Low
Seasonal hazards (wet leaves, snow/ice etc)	Injury to customers, visitors and staff encountering seasonal hazards	<ul style="list-style-type: none"> ▪ Wet leaves regularly swept from emergency exits ▪ Emergency exits steps etc are gritted when necessary ▪ Rock salt available 				Low
Unauthorised access to hostel/grounds by unknown persons	Injury, theft	<ul style="list-style-type: none"> ▪ Ensure instances suspicious/unknown persons entering, staying on the grounds is reported pro-actively ▪ Exterior security lights provided 				Low
Movement of vehicles on approach to/ around site	Risk of collision with property, other vehicles or pedestrians resulting in injury	<ul style="list-style-type: none"> ▪ Speed bumps in use ▪ Delivery vehicles fitted with reversing alarms 				Low
Orienteering, other trails, ball games etc	Injury from natural hazards	<ul style="list-style-type: none"> ▪ Participants should be warned especially if they go off track of risk of brambles, hidden rocks, water gullies etc ▪ Grass area very uneven, molehills etc giving trip hazards 				Low

YHA Derwentwater

Hazards in the grounds

a) Vehicles

- 1) Access to road needs great care - blind corner
- 2) Road - busy narrow roads border the grounds
- 3) Driveway - cars, coaches and delivery lorries
- 4) Delivery lorries reversing into courtyard
- 5) Car parks - vehicles manoeuvring

b) Water hazards

- 1) Stream & waterfall - unfenced above waterfall. Fast flowing - do not enter
- 2) Drainage ditches and other streams marked in blue - fast running water in spate. Do not enter

c) Cliffs, Rocks - marked TTTT on map. Walls & Fences

Please ensure all children are instructed not to climb any rocks, walls or fences.

d) Trees, bushes and woodpile

Please ensure all children are instructed not to climb trees. Warn that there are many brambles, nettles etc. Please keep away from the woodpile (d1) area.

e) Private areas

Hash /// marked areas are private

f) Steps and paths

the steps by the waterfall are extremely slippery, rough, uneven with high steps. Take great care and supervise children. Steep ground in vicinity of waterfall. All paths can be muddy slippery and rough.

g) Games area - bumpy and uneven.

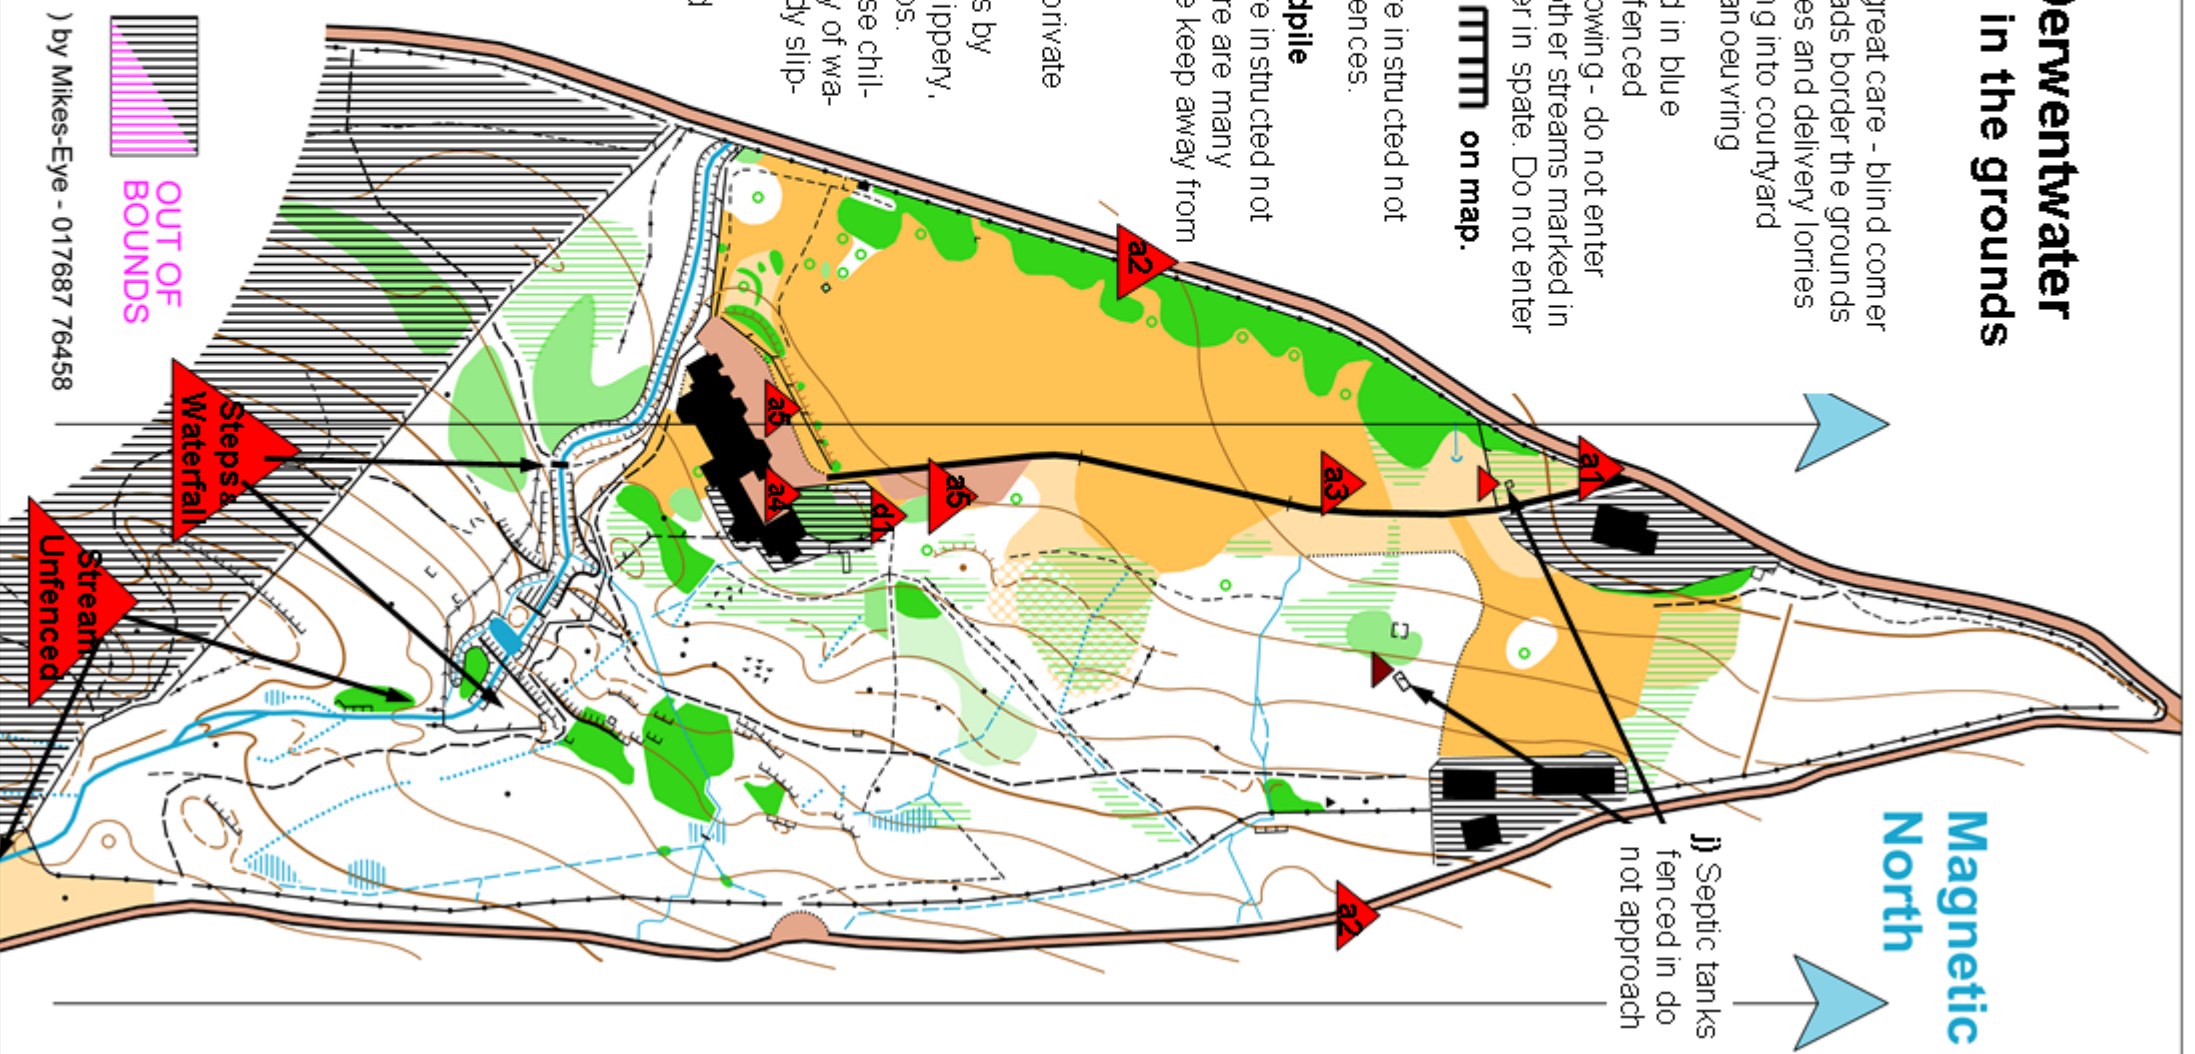

Easy to trip when running. Ensure goals are secured to the ground and ensure goals and other outdoor equipment are used as intended only.

h) Fires and BBQ - no unauthorised fires or BBQs.

i) High winds - avoid walking near trees in high wind due to danger of falling branches

j) Septic tanks fenced in do not approach

Magnetic North

Safeguarding Young People from Harm & Child Protection Policy

Completed by: Tim Butcher Date of assessment: 01/11/21 Review date: 12 months

All staff are to be trained in safeguarding and child protection on induction.

All staff have a legal duty of care for any child staying and are responsible for reporting any concerns on their welfare

- Avoid situations in which you are alone with children
- Do not have any inappropriate physical or verbal contact with young people
- Do not jump to conclusions about any unsubstantiated allegations
- Do not make suggestive remarks or gestures, even in fun
- Do not agree to keep information secret – make it clear that you will report any disclosures

Any suspicion, disclosure or allegation of abuse must be reported to one of the managers (or trustees if managers involved)

Managers and trustees must ensure the relevant authorities are contacted

See the **Safe and secure environment risk assessment** for details of the following child protection issues:

- Staff recruitment policy
- Building security and safety
- Supervision of groups of young people
- Handling difficult situations
- Alcohol sales

Safe Methods of Work

Deep Cleaning Common Area

Completed by: Tim Butcher

Date of assessment: 01/11/21

Review date: 12 months

Environment

- Check room visually on entering for any hazards.
- Look at all surfaces including ceilings, window fittings etc.
- Check floor for any trip hazards – items left on floor or damaged flooring.
- Check shelves, tops of cupboards for falling items risk
- Ensure that no one will be put at risk by your activity.
- If required, cordon off the area and erect signage to warn others.

Personnel

- Check staff member is fit for the task.
- Check if staff member has carried out this task before. If not then all aspects must be checked through thoroughly and any hazards understood.
- Working at heights rules and risk assessment must be followed
- Any manual handling carried as per risk assessment
- If working alone in the hostel ensure there is someone to report to at the end of the shift. Mobile phone at hand, **not** to work at height/ladder

Equipment

- Visually check all equipment needed
- Training given if required
- Tools: Use the tools specifically for the task. Do not improvise.
- Use any PPE required
- Use any chemicals as appropriate to COSHH

For all cleaning below use dilute washing up liquid in a bucket and use cif cream cleaner for stains as per instructions. Use gloves & yellow cloths.

1. Walls & glosswork wiped. If painting is required first see “Painting safe working method of work”
2. Furniture moved as necessary to clean behind – use correct manual handling. Larger furniture eg television may require two people. Turn off/unplug any electrical items to be moved eg TV
3. Ceiling/cornice cleaned – use duster extension if too high to reach.
4. Tables checked for stability. Remove any chewing gum using gloves.
5. Graffiti removed – wear dust mask and eye goggles if hand sanding – do not use electric sander
6. Lighting/shades checked & cleaned as necessary. Where shade is too high to reach safely from a ladder to take down and clean use brush attachment from floor
7. Windows and mirrors cleaned using standard window cleaner and paper towels.
8. Curtains & rails checked/cleaned as necessary. Use two people for high curtains. Check wash settings before laundering
9. Pictures cleaned/checked hang safely
10. Room signs present, fire notice checked, fire door do not shut present
11. Bins cleaned/checked
12. Thorough hoovering including edges/corners behind beds,
13. Behind radiators cleaned /debris removed.
14. Carpets cleaned with carpet cleaning machine
15. Fire places cleaned.
16. Check/clean furniture – covers may be washable.

Safe Methods of Work

Grounds Management

Completed by: Tim Butcher

Date of assessment: 01/11/21

Review date: 12 months

Environment

- Check hazards in grounds map for hazards in the area you will be working in.
- If required, cordon off the area and erect signage to warn others.
- Check area visually for hazards and walk over before working.
- Check weather is suitable

Personnel

- Check staff member is fit for the task.
- Check if staff member has carried out this task before. If not then all aspects must be checked through thoroughly and any hazards understood.
- Working at heights rules and risk assessment must be followed
- Any manual handling carried out as per risk assessment
- If working alone in the hostel ensure there is someone to report to at the end of the shift. Mobile phone at hand, **not** to work at height/ladder

Equipment

- Visually check all equipment needed
- Training given if required
- Tools: Use the tools specifically for the task. Do not improvise.
- Use any PPE required
- Use any chemicals as appropriate to COSHH

Suitable full cover clothing, gardening gloves and stout non-slip footwear to be worn.

- 1. Sweep yard** free of leaves and debris. Use binbags and empty in nearby woodland to compost. Take care to separate any non-compostable material and beware of broken glass.
- 2. Weeding/moss removal.** Use a spade/trowel/hoe to remove moss/weeds from yard/plant pots/garden areas as appropriate for comfort & safety. Debris to be emptied in nearby woodland to compost.
- 3. Sweeping steps..** Gather leaves into a binbag if practicable.
- 4. Trimming shrubs.** Use shears, loppers, bowsaw as appropriate to trim as necessary.

Take care that you are well balanced – work on the ground only (no ladders). Tools are to be kept safely on a visible mat/piece of wood when not in use. Warning notices for members of the public and taped off if necessary. Do not tackle thick branches/branches that you need to reach up to – leave for a professional. Take care with brambles.

5. Bonfire

To burn branches etc. place on area set aside for bonfire. Have a bucket of water handy in case fire gets out of control. Choose a calm day. Keep size of bonfire small. Do not use any fuels such as petrol, spirit etc - this is extremely dangerous. Take care when adding to bonfire taking wind etc into consideration. Fire must be monitored at all times and any members of public kept away. Fire must be extinguished completely when you finish.

6. Unblocking water drains (not sewage)

Wear disposable gloves
Place debris into a bin bag

Painting & Decorating

Completed by: Tim Butcher

Date of assessment: 01/11/21

Review date: 12 months

Environment

- Check hazards in grounds map for hazards in the area you will be working in.
- If required, cordon off the area and erect signage to warn others.
- Check area visually for hazards and walk over before working.
- Check weather is suitable

Personnel

- Check staff member is fit for the task.
- Check if staff member has carried out this task before. If not then all aspects must be checked through thoroughly and any hazards understood.
- Working at heights rules and risk assessment must be followed
- Any manual handling carried out as per risk assessment
- If working alone in the hostel ensure there is someone to report to at the end of the shift. Mobile phone at hand, **not** to work at height/ladder
- Ensure trained in painting and decorating techniques. Especially working safely at heights and use of chemicals

Equipment

- Visually check all equipment needed
- Training given if required
- Tools: Use the tools specifically for the task. Do not improvise.
- Use any PPE required
- Use any chemicals as appropriate to COSHH

You need to be dressed in full cover clothing/boilersuit with a hat when painting above head. Non-slip shoes must be worn.

1. Warning signs needed to keep people out of the areas you are painting until dry.
2. Rooms need to be deep cleaned and furniture moving away from walls. See "Deep cleaning safe working methods" for the area you are working in.
3. Prepare any glosswork by lightly sanding with sandpaper and block. Wear dust mask.
4. Fill any small holes with polyfilla – read safe use instructions and wear a dust mask. Try to get a smooth finish with no need to sand. If sanding required wear a dust mask.
5. Use dustsheets to protect floor/furnishing. Paint pots/trays must stand on piece of wood
6. When painting with undercoat/gloss or other oil based paint ensure the room is well ventilated.
7. Open paint pot with tyre levers – do not use a knife/screwdriver.
8. For painting at a height items needed must be carried one at a time and put into the tray provided. Paint must first be transferred to a small manageable pot/tray. Do not carry large pots up a ladder.
9. Clean all paint items in the sink in the drying room. Use water for all water based paints. For oil based eg gloss/undercoat use white spirit in small quantities in a glass container ensure window is open and gloves are worn when soaking/cleaning brushes etc. Read the instructions on the bottle and comply.
10. Do not dispose of white spirit. Strain and keep in a sealed glass jar. Do not decant into plastic or leave in an open topped container.
